

Koketso Raphasha

Autonomous AI Engineer | Software Engineer | IT Graduate

Pretoria, Gauteng, South Africa | raphashakoketso99@gmail.com | github.com/raphasha27

PROFESSIONAL EXPERIENCE

Autonomous Systems Engineer

Kirov Dynamics Technology | 2025 - Present

Designing and deploying autonomous agentic infrastructure spanning multi-language systems (C, Python, Go, TypeScript). Building self-healing CI/CD pipelines and AI-augmented developer tooling.

Open Source Contributor

GitHub | 2024 - Present

Maintaining multiple open-source repositories including SupportHive-C, FlowSentinel, and RepoPulse.

Tech Accelerator Graduate

CAPACITI | 2025 - 2026

Completed an intensive digital skills accelerator focused on cloud computing, agile development, and enterprise software delivery.

YES Programme Developer

Youth Employment Service | 2024 - 2025

Gained hands-on industry experience in software development and contributed to real-world digital projects.

Software Engineering Student

WeThinkCode_ | 2023 - 2024

Trained in peer-driven, problem-based software engineering. Built real-world applications in Java and Python.

EDUCATION

BSc Computer Science Graduate (Distinction)

Richfield Graduate Institute | 2022 - 2025

Specialized in systems programming, data structures, algorithms, and software architecture. Recipient of academic excellence recognition.

KEY PROJECTS

Sovereign-AI-Nexus

Decentralized multi-agent infrastructure for autonomous professional branding and automated repository hardening.

FlowSentinel

Enterprise traffic governance engine with distributed rate-limiting, sub-millisecond overhead, and Fail-Open resilience.

CyberShield Modern

Next-gen SOC dashboard handling thousands of security events per second via WebSockets and WebGL

visualizations.

SupportHive-C

High-performance background monitoring engine built in C for real-time repository health and CI/CD status enforcement.

TECHNICAL SKILLS

Languages: React, Python, C, C++, Java, Go, Rust, Swift, Node.js, TypeScript

Backend & DB: FastAPI, PostgreSQL, MongoDB, Redis

DevOps & Tools: Docker, Kubernetes, Linux, GitHub Actions, Vercel, AWS

AI/ML: TensorFlow, PyTorch, LangChain
